

# RIFLE - PISTOL - TOMAHAWK

- ① TREAT EVERY WEAPON AS IF IT WILL KILL
- ② KEEP YOUR FINGER OFF THE TRIGGER UNTIL YOU INTEND TO KILL.
- ③ UNDERSTAND YOUR TARGET AND WHAT LIES BEYOND IT.

EVERY FIREARM SHOULD BE MAGAZINE FED, RED DOT TOPPED, AND WHITE LIGHT EQUIPPED. CORPORATE MODELS MUST BE CAMERA EQUIPPED, OBJECTIVE AND OPERATOR FACING.

THE FIREARMS HAVE SAFETY'S ALTERED INTO WHITE LIGHT ACTIVATORS, WITH THE OPERATORS FINGER BEING THE SAFETY THAT PREVENTS ACCIDENTAL DISCHARGE.

THE PISTOL BACKSTRAP AND THE PISTOL GRIP HOUSE RECHARGEABLE/REPLACEABLE BATTERIES TO POWER THE LIGHT, THE OPTIC, AND THE CAMERAS.

THE RED DOT IS DESIGNED FOR SPEED, AND INTEGRAL. IT ALSO FUNCTIONS AS THE CHARGING HANDLE, THOUGH IT DOES NOT CYCLE WITH EACH SHOT. IT IS POWERED, UNMAGNIFIED, AND HAS UNPOWERED CROSSHAIRS.

THE OPERATOR SHOULD ALWAYS POSITIVELY IDENTIFY THE THREAT. IT SHOULD BE CLEARLY VISIBLE TO THE SHOOTER, THE CAMERA, AND THE AUDIENCE. THE WHITE LIGHT IS A VITAL TOOL IN THE KILLING OF A PERSON.
